SKILLS

- Python: 12 years experience. Maintain Python packages, apps, backend. Flask. FastAPI. Litestar. Async.
- Javascript: ~7 years experience, particularly Vue.js and HTMX.
- Ruby: 12 years experience. Maintain Ruby packages. Created many REST APIs with Sinatra.
- R: 20 years experience, research projects and packages. Created over 100 R packages.
- Databases: SQL/SQL-like (BigQuery, Redshift, MySQL, MariaDB, SQLite, PostgreSQL), document DBs (MongoDB, CouchDB), key-value stores (Redis, Valkey).
- Cloud platform experience: AWS, DigitalOcean, Heroku, Google Cloud Platform.
- Cloud data tools: Prefect, Dagster, Xplenty/Integrate.io, Sentry, Papertrail.
- Misc: bash, clusters, SLURM, dabbling with Rust, Workflow Description Language (WDL), static site frameworks (Jekyll, Hugo, Zola).
- AI: Daily driver is Zed w/ various Claude models.

WORK EXPERIENCE

Oct 2023 – present **Fred Hutch Cancer Center, Software Engineer**

Work at Fred Hutch Cancer Center.

- Maintain Python based packages, apps, and infrastructure supporting cancer researchers.

Nov 2022 – Aug 2023 **Deck, Senior Data Engineer**

Deck tells Democratic campaigns who to reach and how to win.

- Manage data orchestration tooling, using Python, deployed on Prefect.
- Developed and maintain tooling for testing data pipelines.

August 2021 – Nov 2022 **OurResearch, Principal Software Engineer and Product Owner**

OurResearch is a non-profit that builds tools to make scholarly research more open and reusable.

- Principal Software Engineer and Product Owner of Unsub (unsub.org) - a web application to help university librarians evaluate research journal access and costs.
- Developed Unsub alone, including: front- (Vue.js) and back-end (Python Flask), database (Redshift), ETL work (Xplenty, Heroku scheduled scripts, Zapier, Bash scripts), sales, demos, account management (HubSpot, Intercom), privacy policy development together with a lawyer.

June 2014 – July 2021 **rOpenSci, Co-Founder**

rOpenSci is a non-profit whose mission is to facilitate reproducible research.

- Along with rest of leadership team, deciding on vision and focal areas.
- Maintained dozens of R packages to help researchers do more reproducible research.
- Developed infrastructure for software review; editor/reviewer for code submitted to rOpenSci.
- Authored hundreds of blog posts on the [rOpenSci blog](#) and my [personal blog](#). Compiled and distributed the [rOpenSci newsletter](#) for 6 years. Co-authored a [book on HTTP testing in R](#).

June 2016 – Jan 2021 **Open Knowledge Maps, Backend Volunteer Contributor**

[Open Knowledge Maps](#) is a visual interface to the world's scientific knowledge.

- Worked with a team using agile processes to maintain integration with many 3rd party APIs.

May 2012 – April 2014 **Simon Fraser University, Postdoctoral Scholar**

- Curated SQL database with data from dozens of researchers across Canada.
- Synthesized data to answer questions about pollinators, leading to 3 peer-reviewed papers.

EDUCATION

2012 **Ph.D.**, Ecology & Evolutionary Biology, Rice University

2003 **B.S.**, Biological Sciences, California State University, Chico
